

TELPAR

Your Printer Solutions Company

PRINTER PAPER SUPPLIES

Telpar carries a full range of paper and supplies for all of the printers we sell. We offer pre-qualified consumables (ribbons and paper rolls) to our customers through a variety of programs and sources, tailored to meet their exact requirements. Check out our online ordering at www.telpar.com

- **Direct Thermal Paper Rolls**
- **Impact Paper Rolls**
- **Receipt Paper Rolls**
- **8 1/2 in wide paper rolls**

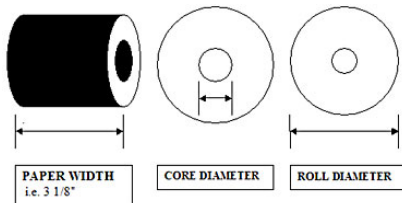

- **Ribbons for POS Printers**
- **Ribbons for POP Printers**
- **Ribbons for Kiosk Printers**
- **Ribbons for Impact Printers**

Critical measurements used in specifications

Inside diameter of the core. - This measures the actual space between the inside walls of the core.

Outside diameter of the core. - This measures the distance from outside surface to outside surface.

Length - the length of the paper in feet

TELPAR APPOINTED MASTER DISTRIBUTOR BY APS – Advanced Printing Systems

Telpar has been appointed by APS - Advanced Printing Systems, as one of only two authorized master distributors in the US to distribute its range of thermal printer mechanisms worldwide. Telpar will be distributing the following APS product lines: MP, FM, SS, ELM, CPMRS, CPHRS, EPM series of thermal printer mechanisms, the EPM 200 series of bucket printers, the CP series of line printers, HSP series of thermal printers and the KM and LPM series of kiosk printers. These products are designed for the medical, kiosk, receipt and self-service sector.

"The appointment of Telpar as the Master Distributor for these products follows a very successful partnership where Telpar has been the printer distributor and integrator for many years." said Frederick Smet, Sales and Marketing Manager, APS. "Telpar has demonstrated outstanding commitment to customer care together with first class systems design, engineering expertise and service and support. We anticipate that Telpar will work closely with other integrators, resellers and end users to broaden our reach into the North American markets for our products".

Vicki Pillsbury, VP of Telpar Manufacturing said "We are delighted to have been selected by APS to be their Master Distributor in the United States. We have considerable expertise and experience in the design and installation of APS thermal printer mechanisms not only into our Telpar printers, but also helping customer integrate them into their custom applications. The products unique compact design feature as an all in one with the printer mechanisms and controller board designed in one modular piece meets the growing demand for compact design in the marketplace. "

MEET OUR SALES TEAM

At Telpar we take a consultative approach to our customers' projects. Our sales team has years of experience built on helping thousands of customers deliver printing solutions that work. We pride ourselves on our ability to respond to your requirements. Let our expert printing solutions staff help you determine the correct printer for your application.

PRODUCT SPOTLIGHT

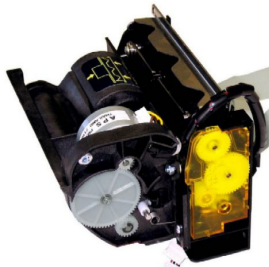

KM3500 Heavy Duty Kiosk Module *Unattended Kiosk Printer Solution for Ticket Applications*

The **KM3500** is based upon APS' next generation printer mechanism – the HSP3500. APS created the HSP3500 to provide a reliable printing solution for “Heavy Duty” applications in extreme and demanding environments. The APS smart presenter efficiently cuts and presents the receipt or ticket to the kiosk end-user. If the end user does not take the receipt within a preset time, the APS smart presenter will retract the receipt for proper disposal.

The compact design of the KM3500 with an adjustable paper roll holder makes integration simple for the kiosk manufacturer. The adjustable paper roll holder can be fixed in eight different positions to provide correct paper positioning and feeding without any guesswork.

The smart presenter also protects the printer from damage by preventing kiosk users from pushing or pulling on the paper. The KM3500 module is equipped with a standard Near End of Paper sensor (NEOP) and a Week End Optical Paper detector (WEOP). These key KM 3500 features ensure that the kiosk will not run out of paper.

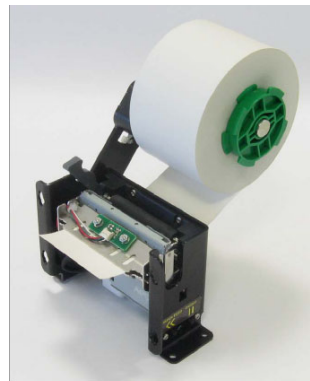

The KM3500 is capable of printing on either 2 or 3-inch width paper from 50 to 250-grams in thickness and has print speeds up to 250 mm/s.

The KM3500's resident FCB500 control board is able to drive both the printer mechanism and presenter at the same time. This standard APS control board includes an extension port to enable customers to directly drive simple sensors and actuators without investing in additional costly electronics. Standard interfaces include RS232, USB and Ethernet connections.

- High resolution printing (8 dots/mm)
- Paper tensioner for large diameter paper roll
- Compact design – non-looping presenter reduces mechanical footprint
- High reliability: 150 km mechanism printing life, 150 million pulses

KM 290HRS-V2—Kiosk Module *Perfect for Parking, Gaming, vending and Kiosks*

APS has packed high-end features into a low-cost, compact design to create the **KM290-HRS-V2** a 2 inch, 24 volt printer module with an integrated controller board using RS232 and USB ports.

This 2-inch kiosk module has a footprint smaller than a CD case with an adjustable paper roll bracket that can accommodate rolls up to 140 cm in diameter. A smaller size with more room for paper makes integration easy and keeps kiosks and self-service applications up and running.

The KM290-HRS-V2 offers full control over printing quality and speed (up to 80 mm/sec), a Near End of Paper sensor, black hole/mark detection and a heavy-duty cutter and a paper exit guide.

The KM290-HRS-V2 also features an infrared optical sensor to prevent paper jams by sensing when the bezel is blocked and putting the printer into sleep mode; once it senses the blockage is removed, the printer completes the print-out. An external keyboard with on/off line status and paper feed buttons make the KM290-HR-V2 extremely user-friendly.

The KM290-HRS-V2 is the ideal kiosk solution for applications where a compact size and low price are critical, but high end features are a must. Applications include, but are not limited to, photo kiosks, gas pumps, internet kiosks, vending machines, parking, self service kiosks, and internet kiosks.

- Print text, graphics and barcode
- Full control over printing quality/speed
- Integrated switches and LED (on-off line status, paper feed)
- Software programmable energy consumption
- Three resident fonts
- Windows & Linux Drivers
- Powerful Text Printing Modes
- Powerful Graphic Modes
- Hole/Mark Detection/Correct Paper Path Exit Detection
- Multi position (3) Paper Roll support

APS PRODUCT HIGHLIGHTS

Heavy Duty Ultra High Speed Printers

Specially designed for Gaming, ATM, Parking, Kiosk, Vending, Gas Pumps and Entertainment

HSP3500

HSP3500 is APS new Heavy Duty Ultra High Speed thermal printer which has been introduced to better serve kiosks applications as specially designed for Gaming, ATM, Parking, Kiosk, Gas Pumps and Entertainment.

Full easy loading printer and cutter, HSP3500 is available in Kiosk or Easy Loading version according to end user different application needs. 80 or 82mm paper width, it prints m paper thickness up to 250mm/s and guarantees 2M cuts up to 220 new revolutionary patented cutting concept. It has near straight paper path for thick paper printing.

Very compact 125x82,5x35,7mm (WxDxH), APS HSP new series has been ideated to add external control board and presenter.

HSP2500

HSP2500 is APS new Heavy Duty Ultra High Speed thermal printer which has been introduced to better serve kiosks applications as specially designed for Gaming, ATM, Parking, Kiosk, Vending, Gas Pumps and Entertainment.

Full easy loading printer and cutter, HSP2500 has been provided with a straight paper path for thick paper printing. Interfaces include USB2.0 and high speed RS232. Offers full and partial cuts. You have the ability to add external presenter and sensor control.

2 inches printers, 60 or 62mm paper width, it prints up to 200mm/s and guarantees 2M cuts life up to 220mm paper thickness thanks to the new revolutionary patented cutting concept.

Very compact 95x74x30mm (WxDxH), APS HSP new series has been ideated to add external control board.

2 Inch Wide Printer Mechanisms RS232C and USB interfaces

CP290HRS

- Uses 60mm wide paper
- Front/ Bottom Loading Version
- Optional Cutter
- Windows & Linux drivers
- Out of Paper Sensor
- 18 to 27VDC
- RS232C and USB interfaces
- Customizable IC, I/O extension boards

3 Inch Wide Printer Mechanisms RS232C and USB interfaces

CP324HRS

- 80mm (3.15inch) wide paper
- Optional Cutter
- Windows & Linux drivers
- Out of Paper Sensor
- Thermistor
- 18 to 27VDC
- Integrated control board
- RS232C and USB interfaces
- Hole/ mark detection

4 Inch Wide Printer Mechanisms RS232C and USB interfaces

CP424HRS

- 114mm (4.5inch) wide paper
- Autofeed
- Optional Cutter
- Windows & Linux drivers
- Paper Sensor
- Print Head Up detector
- 18 to 27VDC,
- Integrated control board
- RS232C and USB interfaces
- No power-up sequence required

Telpar Printer Bezels for Kiosk Printers

The Telpar Bezel Kits for modular printers permit the correct and trouble-free delivery of printed documents "through the wall" of kiosk-type enclosures to the hands of the customer.

These bezels accommodate MTP2283, MTP22XX, MTP-28XX, MTP-7582/83 and MTP-7632/33 kiosk printers.

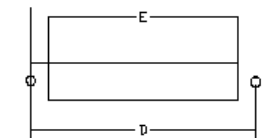

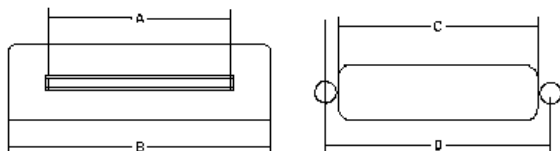

They may also be used with printers from other manufacturers for similar purposes.

Telpar's printer bezels come in two, three, four, and nine-inch models.

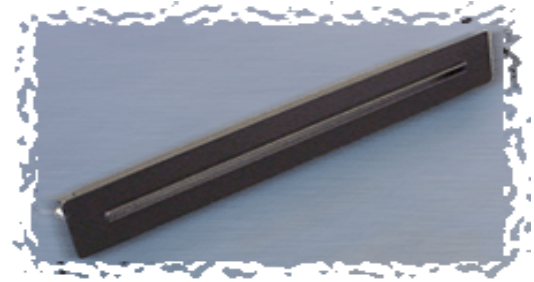

Easy Installation

- Mounts in wooden or metal housings from 1.59 mm (1/16 in) to 158 mm (5/8 in) thickness.
- Maximum mounting allows +/- 3.18 mm (1/8 in) for adjustment.
- Funnel design for hassle-free operation.
- Matte finish stainless steel construction.
- Mounting hardware included.

Dimensions			
Dim.	Size 2	Size 3	Size 4
A	2.56 (65)	3.75 (95)	4.75 (110.6)
B	4.19 (106)	5.38 (136.5)	6.38 (162)
C	2.91 (74)	4.10 (104)	5.10 (130)
D	3.438 (87.33)	4.625 (117.48)	5.625 (142.88)
E	2.69 (68.3)	3.88 (98.4)	4.88 (124)
Part #	901029.1020	901029-1030	901029-1040

Bezel for up to 9" Paper Width Kiosk Printers

Available in two models:

Bezel, Size 9 without delivery: 95 mm (3.75 in) width Version

Bezel, Size 9 with delivery: 241 mm (9.5 in) width Version

Features:

- **Easy Installation**
- **Mounts in wooden or metal housings from 1.59 mm (1/16 in) to 158 mm (5/8 in) Thickness**
- **Maximum mounting allows +/- 3.18 mm (1/8 in) for adjustment.**
- **Funnel design for hassle-free operation**
- **Matte finish stainless steel construction**
- **Mounting hardware included**

Kenosha Public Museum Donation Kiosk Application

The Kenosha Public Museum has a kiosk application for its donor program "Own a Stone! Buy a Boulder!" . The kiosk application lets museum visitors make a contribution, select their stone, rock or boulder, and, if they wish, dedicate the rock in honor of or in memory of a loved one. Visitors are attracted to the kiosk by a "splash screen" that features the trumpeting of an animated mammoth. Upon touching the "splash screen," visitors are presented with a menu that lets them make a contribution, search for donors or view a specific boulder.

To make a contribution, the visitor selects their pledge amount, then selects the wall section that contains a boulder targeted for "virtual ownership." The kiosk then displays all the stones in that wall section available for purchase. The visitor touches any rock that looks promising and is prompted to "adopt." After receiving confirmation of the selection, the kiosk prints a slip that the donor takes to the museums front desk to finalize pledge information. After submitting their contact information at the front desk, donors return to the kiosk to receive their "Certificate of Virtual Ownership."

The kiosk uses a 17" touchscreen display from Elo TouchSystems and **thermal printer from Telpar** for printing pledge confirmations and certificates of ownership. A MySQL database houses information on the 6000 rocks in the wall.

Why Telpar is the Right Choice

- Telpar has been offering innovative-printing solutions for over 30 years.
- Telpar will provide printer function and configuration knowledge for your printing solution
- Telpar understands the complexity of the Printing Solution in the context of the current and future IT infrastructure
