**Telpar Introduces the MTP-7632 a 3 inch Direct Thermal Printer  
with USB and Serial and Parallel Interfaces**

*Print Speed Up To 5.9 Inches Per Second, USB Connectivity and Flexible Mounting Options  
Support a Wider Range Of Self-Service And Kiosk Applications*

Dover, NH – (May 4, 2009) – Telpar, one the of industries leading thermal printer manufacturers specializing in design, manufacturing and distribution of self service Kiosk and specialty receipt printers, introduces on its newest 3 inch direct thermal printer, the MTP-7632. This new 3 inch printer features; USB, serial and parallel interface connectivity, print speeds up to 5.9 inches per second allowing for increased productivity in a wider range of self service and kiosk printer applications; including receipt ticketing, parking systems, vending, gaming, ATM, as well as many remote printing environments.

The MTP-7632 thermal printer supports a print resolution of both 203 dpi with print speeds up to 5.9 inches per second (150 mm/s) and 300 dpi with print speeds up to 3.9 inches per second (100 mm/s). The printer has both horizontal and vertical paper roll configurations allowing for use in a wider array of enclosure designs.

The printer is available with or without a built in auto cutter that provides a full cut or partial cut (for non presenter models). Sensors indicate Out Of Paper, Black Mark (For Top Of Form), Paper Low, Print Head Up, Cutter Jam And Document still in document presenter. The MTP- 7632 paper cutter has an operational life of 1 million cuts. Paper options include continuous rolls and marked paper. Maximum paper roll outer diameter 254 mm with a paper width of 82.5 mm. Options include document presenter and paper delivery bezels.

Telpar printers come complete with Windows drivers, enabling users to easily print graphics, text, barcodes, from Windows applications and other prevalent programs. Print drivers are available for Windows 98, 2000, NT4.0, Server 2003, XP and Vista. The thermal printer also has a flash memory allowing it to store and print logos making it a great choice for applications like hospitality, retail, ticketing and coupons. The printer firmware can also be re-flashed with upgrades when connected to a PC.

– MORE –
